

Exterior Treadwall may be mounted on concrete -block footings with a pea gravel landing area.

**Footings: Concrete blocks.
Specify: "load bearing stretcher blocks"
Bury with a 3" gravel bed so that flat face of block is facing up.
Flat face should be about 3/4" above grade.
Gravel: 1/2" pea gravel to a depth of 7".
Engineered wood chips to a depth of 9" may be substituted for gravel**
